2.

ACKNOWLEDGEMENT

First of all, I thank The Almighty God, for guiding light for my life, for giving me the strength and encourage to complete this project successfully.

I am extremely thankful to **DR. N SASIKUMAR** (Principal, University Institute of Technology, Kottarakkara) for his blessings and inspiration.

I express the sincere gratitude towards **Mr. REGHU P M** (Finance Manager, for permitted me to do the project.

I would like to express my deepest gratitude to **Mr. VISHNU KUMAR** (HOD, Department of Management) for his valuable guidance and support on the completion of the project.

My wholehearted thanks to my guide **Mrs. SYAMA V** (Faculty, Department of Management), for her valuable guidance and support in this endeavor.

I would like to extend the heartfelt obligation to all company officials and members for their guidance and constant supervision, for providing necessary information for the completion of the project.

I express the deepest gratitude to my parents and all the friends for their kind cooperation, encouragement, and inspiration, which substantially contributed towards making this project a brilliant success.

JESTIN SHAJI

Place: Kottarakkara

Date:

DECLARATION

I JESTIN SHAJI hereby declare that the project report entitled **"A STUDY OF CONSUMER PERCEPTION TOWARDS KEPCO POULTRY PRODUCTS IN PETTAH, THIRUVANANTHAPURAM"** is an original work carried out by me under the guidance of **Mr. DEEPAK V** (Faculty of Department of Management) towards the partial fulfillment of the award of the Bachelor of Business Administration degree from the University of Kerala during the period of (2023-2026) of study in University Institute of Technology, Kottarakkara.

This project has not been submitted in part of any other degree or diploma of this University or any other university.

Place: Kottarakkara

CHAPTER-1
INTRODUCTION

INTRODUCTION

1.1 GENERAL INTRODUCTION

In today's highly competitive market environment, understanding customer perception has become a crucial factor for the success and sustainability of any business organization. Customer perception refers to the way consumers interpret and evaluate a company's products, services, brand image, and overall performance based on their personal experiences, expectations, and interactions. These perceptions significantly influence their level of satisfaction, trust, and loyalty, which in turn affect their purchase decisions and long-term relationship with the brand. In markets where customers have multiple alternatives, even small differences in perceived quality, pricing, or service can determine whether a consumer continues with a brand or shifts to competitors.

Organizations, therefore, must continuously assess and analyze how their products and services are viewed by customers in order to identify strengths and areas for improvement. By understanding consumer opinions and expectations, companies can enhance service quality, refine marketing strategies, and build stronger customer relationships. As highlighted in various studies, customer perception is a key determinant in shaping consumer behaviour and plays a vital role in strategic decision-making processes.

According to Kotler and Keller (2012), "customer perception is the process by which individuals select, organize, and interpret information to form a meaningful picture of the product, service, or brand." This definition emphasizes that perception is subjective and varies from one consumer to another based on their experiences, expectations, and prior knowledge. Understanding these perceptions allows organizations to design their services and communication strategies to better meet customer needs. A clear understanding of customer perception contributes to higher satisfaction, long-term loyalty, and competitive advantage in the dynamic business environment.

This project is entitled **"A Study of Consumer Perception towards KEPCO poultry products in Pettah, Thiruvananthapuram".** The period of the study ranges from 22nd December 2025 to 06th January 2026

1.2 REVIEW OF LITERATURE

- Alexander Zauner, Monika Koller,Isabella Hatak (2015) "Customer Perceived Value—Conceptualization and Avenues for Future Research"

The authors conceptualized consumer perceived value as a dynamic and context-dependent construct influencing attitudes and behavioral intentions. They emphasized the importance of understanding consumer perception for long-term relationship building. This study was selected because it provides directions for future research on consumer perception. It supports the present study by offering a strong conceptual framework.

- Divya Singhal, & V. P. Padhmanabhan (2008) "A Study on Customer Perception towards Internet Banking"

The study analyzed customer perception toward internet banking and identified security, convenience, trust, and ease of use as major influencing factors. It concluded that these perceptual factors strongly affect customers' acceptance and usage of online banking services. This study was chosen because it highlights key determinants of consumer perception in digital banking. It is relevant to the present study as it focuses on perception-based decision making.

- Farheen Javed & Cheema(2017) "Customer Perceived Value, Satisfaction and Loyalty in Online Banking: The Mediating Role of Customer Satisfaction"

The study highlighted that customer perception of value plays a crucial role in shaping customer satisfaction and loyalty in online banking services. It emphasized that positive perceptions enhance satisfaction, which in turn leads to stronger customer loyalty through effective CRM practices. This study was chosen because it clearly explains the relationship between consumer perception, satisfaction, and loyalty. It supports the current research by emphasizing the mediating role of satisfaction.

- Joseph Lapierre (2000) "Customer-Perceived Value in Industrial Contexts"

Lapierre explained that consumer perception of value in industrial contexts is based on a comparison between perceived benefits and perceived sacrifices. The study showed that customer perception varies depending on service performance, costs, and relationship quality.This study was selected because it offers an early and influential conceptualization of consumer perceived value. It provides a strong foundation for understanding perception

in service-based relationships.

- Samra Chaudary,Zohad Zahid, Saad Shahid,Shamila.N.Khan,Sana Azar (2016) "Customer Perception of Corporate Social Responsibility and Its Impact on Customer Satisfaction and Loyalty"

The authors examined consumer perception of corporate social responsibility initiatives and found that positive CSR perceptions enhance trust and brand evaluation. They also noted that consumer perception of CSR influences satisfaction and loyalty intentions. This study was selected because it extends consumer perception beyond functional service attributes. It is relevant as it shows how ethical and social perceptions affect consumer behavior.

- Septa Akbar Aulia,Inda Sukati, Zuraidah Sulaiman (2016) "A Review: Customer Perceived Value and Its Dimensions"

The authors reviewed consumer perception of value and identified multiple dimensions such as functional, emotional, social, and economic value. They emphasized that consumer perception is a multidimensional concept influencing satisfaction and behavioral intentions. This study was selected because it provides a comprehensive theoretical understanding of consumer perception. It is useful for identifying key perception dimensions relevant to this research.

- Sridhar Ramaswamy,Natalie DeClerck (2018) "Deep Learning and Natural Language Processing for Analyzing Consumer Perception from Online Reviews"

The study explored consumer perception using deep learning and natural language processing techniques applied to customer reviews. It demonstrated that advanced analytics can effectively capture hidden patterns in consumer perceptions. This study was selected because it introduces a modern methodological approach to studying consumer perception. It is useful for understanding how perception can be analyzed using big data techniques.

- Yingzi Xu,Robert goedegebuure,Beatrice Van der Heijden (2007) "Customer Perception, Service Quality and Loyalty in the Chinese Securities Industry: The Mediating Role of Customer Satisfaction"

The authors examined customer perception in the Chinese securities industry and found that perceptions of service quality, trust, and professionalism significantly influence

customer satisfaction. They also demonstrated that customer perception indirectly affects customer loyalty through satisfaction as a mediating variable. This study was selected because it provides a clear mediation model linking consumer perception to satisfaction and loyalty. It is relevant to the present research as it empirically explains how perception predicts customer behavior

1.3 STATEMENT OF THE PROBLEM

Consumer perception plays an important role in influencing purchasing decisions and customer satisfaction. Different consumers may have different opinions and experiences about a product or service based on quality, price, and service. This study aims to understand consumer perception and identify the factors that influence their views and buying behaviour.

1.4 SCOPE OF THE STUDY

This study focuses on examining how consumers in Pettah, Thiruvananthapuram perceive KEPCO Poultry Products. The study also includes an analysis of factors such as product quality, price, cleanliness, service, accessibility, and trust in the brand that influence consumer buying decisions. The scope of the study is restricted to selected consumers in the Pettah area and is limited to KEPCO poultry products only. The results of the study will provide useful information to the organization for understanding customer expectations and improving their marketing and operational practices. From an academic point of view, the study helps in relating theoretical concepts of marketing and consumer behavior with real-life market situations.

1.5 OBJECTIVES OF THE STUDY

- To study the purchasing behaviour of consumers towards KEPCO poultry products in Pettah, Thiruvananthapuram.
- To identify the factors influencing consumer opinion on the quality of KEPCO poultry products.
- To understand consumer perception towards the quality of customer service provided by KEPCO
- To know customer satisfaction with respect to the quality of KEPCO poultry products.

- To understand consumer perception towards the quality of KEPCO poultry products in Pettah, Thiruvananthapuram.

1.6 SIGNIFICANCE OF THE STUDY

- The study helps to understand how consumers perceive the quality of poultry products.
- It identifies the factors such as freshness, price, and service that influence consumer buying decisions.
- The study helps to measure the level of customer satisfaction with poultry products.
- It highlights areas where improvements are needed to meet consumer expectations.
- The findings of the study are useful for improving product quality, service, and overall customer satisfaction.

1.7 RESEARCH METHODOLOGY

Research methodology refers to the systematic process used to collect, analyze, and interpret data for a study. It explains the methods, tools, and procedures adopted to achieve the objectives of the research. It helps in selecting appropriate research techniques and ensures the reliability of the data collected. A proper research methodology improves the accuracy and validity of the study findings.

RESEARCH DESIGN

Research design refers to the overall plan and structure of a study that guides the collection and analysis of data. It defines how the research is conducted, including the methods, tools, and procedures used. A proper research design helps ensure accuracy and reliability of the research findings In this study, descriptive research design is used.

Descriptive research is a type of research that describes the characteristics of a population, situation, or phenomenon. It focuses on presenting accurate information without manipulating variables.

DATA COLLECTION

Types of data in the study are:-

- Primary Data

The data for the study were collected through a survey using a structured questionnaire administered to respondents within the organization. In addition, relevant information

was gathered through discussions with managers and through direct observation.

- Secondry data

Secondary data refers to data that has already been collected and published by others for a different purpose. It is obtained from sources such as books, journals, websites, company reports, and previous research studies.

POPULATION

The population of the study consists of customers who purchase and consume KEPCO poultry products in Pettah, Thiruvananthapuram. It includes consumers from different age groups, income levels, and purchase frequencies who regularly buy poultry products. These customers are directly involved in the purchasing and consumption process and can provide reliable information regarding product quality, pricing, and service efficiency.

- Sample unit

Sample unit refers to the individual element or respondent selected from the population for the purpose of data collection in a study.

Retailors of KEPCO were chosen as sample unit.

- Sample instrument

Sample instrument refers to the tool or method used by the researcher to collect data from the selected sample. Common sample instruments include questionnaires, interview schedules, and observation methods, which help in gathering accurate information for the study. Qustionnaire method is used for this study.

- Sample size

Sample size refers to the total number of respondents selected from the population for collecting data in a study. Sample size is 100 customers from KEPCO Pettah, Thiruvananthapuram.

- Sample method

The sample method helps the researcher select respondents who are easily accessible and willing to provide information. It saves time, cost, and effort while collecting data for the study. Non-probability sampling design based on convenient sampling method has used for research study.

- Sampling design

Sample design refers to the techniques or procedures the researcher would adopt in item from the sample. Sampling design ensures systematic selection of samples to represent the population effectively. It improves the reliability and accuracy of the research findings

1.8 TOOLS AND TECHNIQUES OF DATA ANALYSIS

SCALING TECHNIQUES

The study uses a Four-Point Rating Scale to measure consumer perception and satisfaction. The questions are designed with four response options such as Excellent, Good, Average, and Poor or Very Satisfied, Satisfied, Dissatisfied, and Very Dissatisfied. This scale helps to obtain clear opinions from respondents and makes the data easy to analyze.

In addition to this, Nominal Scale is used for collecting demographic information such as age, gender, and other classification-based questions. These scaling techniques help in converting respondents' views into numerical data, making statistical analysis and interpretation more effective.

PERCENTAGE ANALYSIS METHOD

Percentage analysis method is a statistical tool used to analyze and interpret data by converting numerical values into percentages. It helps in easy comparison and understanding of respondent opinions and trends in the study.

$$\text{Percentage} = \text{Number of respondent}/\text{Total number of respondent} \times 100$$

DIAGRAMMATIC REPRESENTATION

It is a use of geometric figure as diagram to improve the data representation**.**

- Bar chart

A bar chart is a graphical representation of data using rectangular bars. Each bar shows the value or quantity of a category, and the length of the bar represents the size of the data.

- Tables

Tables are used to present data in a systematic from using rows and columns. They help in organizing information clearly and make it easy to understand and compare different values.

1.9 LIMITATION OF THE STUDY

- The study is based on a limited sample size, which may not fully represent the entire population.

- The findings of the study depend on the responses given by the respondents, which may be biased or inaccurate.
- The study is confined to a short period of time.

  FINDINGS, SUGGESTIONS AND CONCLUSION

CHAPTER-2

PROFILE

PROFILES

2.1 INDUSTRY PROFILE

Poultry egg and meat are important sources of high-quality proteins, minerals and vitamins to balance the human diet. Depending on the farm size, layer farming can be a main source of family income or can provide income and gainful employment to farmers throughout the year. Poultry manure has high fertilizing value and can be used for increasing the yield of all crops. Specifically developed breeds of egg-type chicken are now available with traits of quick growth and high feed conversion efficiency. Poultry is one of the fastest growing segments of the agricultural sector in India today. The production of agricultural crops has been rising at a rate of 2 percent; India is now the world's fifth largest producer of broiler.

Driving this expansion is a combination of factors such as growth in per capita income, a growing urban population and falling real poultry prices. The poultry industry, which provides a cheap source of animal protein, has taken a quantum leap in the last three decades, evolving from a near backyard practice to a venture of industrial promotion.

The poultry sector in India has undergone a paradigm shift in structure and operation. This transformation has involved sizable investments in breeding, hatching, rearing and processing. Farmers in India have moved from rearing non-descript birds to hybrids which ensure faster growth, good livability, excellent feed conversion and high profits to the rearer. High-quality chicks, equipment, vaccines and medicines are available. Technically and professionally competent guidance is available to the farmers. Management practices have improved and mortality incidences are reduced to a great extent.

The industry has grown largely due to the initiative of private enterprise, minimal government intervention and considerable indigenous genetic capabilities, along with adequate support from the complementary veterinary health, poultry feed, poultry equipment and poultry processing sectors. The industry has created direct and indirect employment for about 3 million people.

2.2 COMPANY PROFILE

Kerala State Poultry Development Corporation Ltd (KEPCO) is a public sector undertaking of the Government of Kerala. The company was incorporated on 18th August 1989. It was started with the aim of development and production of poultry sector in Kerala. Modernizing the poultry in Kerala is the major thrust of the corporate strategy of Kerala State Poultry Development Corporation Ltd. Poultry is emerging as the fastest growing sub-sector of agriculture contributing sizable output to the state economy.

Poultry development in the country has taken quantum leap in the last three decades and is growing by 15% to 70% of the total production is the commercial poultry. When the national scenario shows a quantum leap in poultry production, the situation in our state is showing negative trend with a declining growth of 15%. So this is contrary to the scenario in national level. Through lots of attempts were made by the government through both state plans and decentralized plans, we could not attain the expected goal of the sufficiency in egg production during 1970. Kerala was an exporter of egg to other parts of the country with chengannur and kottarakkara railway station famous for centers of rail transport of egg to other state. So we are producing more than demand of the situation now is that important state during those periods. Now we are importing about 3000 Crores of Hen egg and 40 Crores of duck egg every year and the drain of around 650 Crores to the neighboring state.

The per-capital availability of egg has slide down from 76 to 36 in 2003. The poultry population came down to 110 lakhs in 2003. The same is with the duck population which declined to 66 lakhs from 11.2 lakhs. As per the ICMR recommendations the average per capital egg consumption should be 180 in adults and 90 in children. Taking into account that the child accounts for only 20% of the total population, the required egg for Kerala is 472 crores and our present production is only 120 crores. The shortage is 360 crores. At present the requirement is met by importing eggs from other states. This indicates that there is a potential market for an excess production of 360 crores in our state. For the poorest of the landless, the major issues are food security and risk spreading through subsidiary income, which are to be addressed through targeted egg production. It is a well known fact

that a fairly significant proportion of landless and marginal farmers make out their living from poultry and other small ruminants. Backyard poultry requiring hardly any infrastructure is a potential tool for upliftment of the poorest of the poor. It has a very positive impact to improve the socio economically backward people. It may also be mentioned that groups of small producers cater to the needs of the customers and also have a specific performance for coloured birds and brown shelled eggs both of which are mostly produced in the rural backyard. Poultry production programs meet the requirements of the rural customers while constituting a source of substance income as a subsidiary occupation by taking up coloured birds ranging from 10–20 per family in their backyards. Such a unit requires very little hand feeding and can give a fairly handsome return with a bare minimum night shelter.

Commercial poultry production in Kerala is not feasible owing to various reasons and hence the targeted goal of doubling the egg production in 2 years and making self-sufficiency in 5 years cannot be achieved by large scale commercial production, which was only alternative to this is strengthening of backyard poultry production, which as once Kerala own alternative to this strengthening of backyard poultry production, which as once Kerala own method of bulk and quality egg production at bare minimum cost.

OBJECTIVES OF THE COMPANY

- To carry on promote, establish, administer, own and run, improve, aid, counsel, finance directly and indirectly, engage in production, processing storage and sale of all or any business of poultry, duck, quail, rabbits and other game birds, their products, buy products, their feed equipment.
- To establish maintain and operate farms to rear poultry, duck, quail, rabbit and other game birds, to produce egg, egg products and meat from poultry duck quail, rabbit and some other birds to produce products like feather-cum, pelt to deal in import, export and transport of product made from poultry, duck, quail, rabbit, other birds their buy products.
- To aid, advice assist finance, promote or otherwise subsidiaries interest of industries, dealing poultry, duck quail, rabbit and other birds in the state whether owned or run by government, statutory body, company cooperative society, firm or individual and to provide them with capital and other assistance for the conduct of

their work or businesses or to enable them to develop and improve the method of manufacture, management and marketing or other techniques of production.

- To establish, maintain, operate industries, units and plants for manufacture of poultry, duck, quail, rabbit, other products, their feed and equipment and to transport, store, distribute, sell, import and export such poultry, duck, quail, rabbit, other game birds, their products their fees and equipment and other connected materials.

VISION

- To produce a quality layer and broiler chick required for the state.
- Intervene in real broiler market and provide quality meat to public/ customer at affordable rate.
- To give technical assistance/ consultancy to farmers engaged in poultry rearing.
- Enriching small farmers, landless, labour families and families below poverty line through a more holistic and self-reliant approach not only terms of improvement of income employment and nutritional status but also in term of fostering community development is envisaged on the large canvas of rural development using poultry as a development is envisaged on the canvas of rural development using poultry as a tool.
- To ensure food security in Kerala by augmenting egg and meat production.
- To prevent drainage from the state economy and to make it more vibrant.
- To create employment opportunities though poultry rearing.
- Supply of safe and quality meat products the health of the public.

MISSION

To improve the per capita income of the poultry sector through interventions in credit, technology, marketing and capacity building

ACTIVITIES AND VENTURE

The objective of KEPCO as spelt out in its bye-laws is to carry out activities for promoting production, procurement, processing and marketing of poultry products. Kerala State

Poultry Development Corporation Limited (KEPCO) was established with the objective of developing poultry production in the state. Modernizing the poultry in Kerala is the major focus of KEPCO.

In order to achieve this objective KEPCO has taken activities which can very broadly be classified as:

- BROILER BREEDING FARM AND HATCHERY, KUDAPPANAKUNNU
- LAYER BREEDING FARM AND HATCHERY, KOTTAYAM
- DUCK BREEDING FARM, KOTTAYAM
- POULTRY FARM, PETTAH
- MEAT PROCESSING PLANT, PETTAH
- FEED MIXING PLANT, KOTTAYAM

Implementation of schemes

- STEP 1, STEP 2, SGSY AND RSVY SCHEME OF GOVERNMENT OF INDIA
- INFRASTRUCTURAL SCHEME
- KUNJU KAIKALIL KOZHIKKUNJU
- SCHEME FOR SOCIAL EMPOWERMENT OF WOMEN COMMUNITY
- STATE PLAN SCHEME 2007-2009
- STATE PLAN SCHEME 2008-2009

Broiler breeding farm and hatchery, Kudappanakunnu

One of the corporations located at Kudappanakunnu in Trivandrum District. The major activities in this unit are the broiler and hatching of eggs. The envisaged capacity of the farm is to rear 25000 laying, presents and hatch 56 lakhs egg per annum. Currently the farm has the infrastructural capacity for rearing 15000 parents and to produce around 39000 eggs per week.

The kudappanakunnu farm is headed by farm manager who co-ordinates all the activities in the farm. The various activities in the farm and hatchery are coordinated and supervised by a farm supervisor and Hatchery supervisor respectively. All the activities in the kudappanakunnu farm are grouped under the following sections activities in each of these sections and respective man power requirements are discussed in the following paragraphs:

- Broiler breeding
- Brooder shed
- Grower shed
- Hatchery
- Bio-manure plant

HATCHERY

The hatching of a broiler egg carried out in this section. The eggs collected at the layer sheds are brought into the hatchery and eggs are graded and fumigated. Then they are loaded into the setter machine and to the hatcher machine after that the hatched eggs are pulled out and day old chicks are placed in boxes and packed.

BIO-MANURE PLANT

The production and sale of bio manure is also a commercial activity of the corporations as part of its strategy to handle the waste produced in the farm effectively.

LAYER BREEDING FARM AND HATCHERY, KOTTAYAM

The layer farm of KEPCO is located at Kottayam district. The farm has an installed capacity to accommodate 6000 layer parents. The farm also had capacity to produce 10 lakhs day old commercial layer chicks per annum. Apart from the layer farm activities a duck farm is also located in the kottayam farm.

DUCK FARM KOTTIYAM

The duck farm of the corporation started function at the layer farm, kottiyam from February 2009 onwards. This envisages rearing and hatching of Khakhi Campbell ducks. The duck hatchery is under construction and is yet to be operational. Currently this farm holds about 550 parent stock.

The ducks are reached on three stages and are kept in broader, grower and layer shed which is similar to the rearing of layer/broiler birds. In general the nature of activities in the duck farm is similar to that of a layer/ broiler breeding farm. The feeding of duck, vaccination of duck, identification of weak duck, mortality, egg collection etc are activities with similar nature.

DUCK HATCHERY

The duck hatchery of the Kottayam farm was under construction during the study period. The envisaged capacity of the hatchery is 9000 duckling per week. Therefore studies are not carried out in this section. However, details are collected during the discussion with officers. The man power requirements at various levels are established based on the discussion and studies carried out by the study team at the layer hatchery.

POULTRY FARM (HOLDING) PETTAH

The holding farm is located at pettah and is attached to the head officer of the corporation. The purpose of this farm is to hold birds of two months old required for the meat processing plant. These birds are brought from the integration farm maintained by the corporation. The current capacity of the farm is to hold 500 birds under the control of the technical department.

MEAT PROCESSING PLANT

The meat processing plant located at the poultry complex, pettah was established during 2005 to develop high quality chicken meat by way of scientific methods in a hygienic and healthy environment. The senior manager heads this plant. The processed meat from MPP is sold through three sales outlets and one mobile sales van.

INTEGRATION

Apart from the directly manned, certain private farms developed by the corporation for providing the necessary backyard and forward linkage for poultry farming. There are different types of integration farms. The birds to be distributed under the backyard poultry scheme is being reached in layer integration farms and broilers required for meat plants are reached broiler integration farms. Under these schemes, day old chicks, feed and medicine, are provided to selected farmers.

CHAPTER-3
THEORETICAL BACKGROUND

Marketing refers to the process of identifying customer needs and wants and satisfying them by providing suitable products or services at the right price, place, and time. It focuses on creating value for customers and building long-term relationship.

According to Philip Kotler,

Marketing is a social and managerial process by which individuals and groups obtain what they need and want through creating, offering and exchanging products of value with others.

CONCEPT OF CONSUMER PERCEPTION

Consumer perception refers to the way consumers select, organize, and interpret information about a product, brand, or service to form a meaningful understanding. It is shaped by factors such as product quality, price, brand image, advertisements, personal experiences, and word-of-mouth. Since perception is subjective, different consumers may perceive the same product differently based on their expectations, beliefs, and past experiences.

Consumer perception plays a vital role in influencing consumer buying behaviour and decision-making. A positive perception leads to customer satisfaction, brand loyalty, and repeat purchases, while a negative perception can discourage consumers from choosing a product or service. Therefore, organizations focus on improving product quality, communication, and customer service to create a favourable perception in the minds of consumers and gain a competitive advantage in the market.

IMPORTANCE OF CONSUMER PERCEPTION

- Helps in understanding consumer needs, preferences, and expectations.
- Influences consumer buying behaviour and purchase decisions.
- Builds customer satisfaction and trust towards the brand.
- Creates brand loyalty and encourages repeat purchases.
- Affects the brand image and reputation of the organization.
- Helps organizations improve product quality and services.

FACTORS INFLUENCING CONSUMER PERCEPTION

- Product Quality – The quality, freshness, and reliability of a product strongly affect how consumers perceive it.

- Price – Reasonable and fair pricing creates a positive perception, while high prices may create negative perception.
- Brand Image – A well-known and trusted brand builds confidence in the minds of consumers.
- Advertising and Promotion – Advertisements, offers, and promotions influence consumer opinions and awareness.
- Personal Experience – Past experiences with the product or service shape future perceptions.
- Word of Mouth – Opinions and recommendations from friends, family, and others affect consumer perception.
- Packaging and Labeling – Attractive, informative, and hygienic packaging creates a good impression
- Packaging and Labeling – Attractive, informative, and hygienic packaging creates a good impression.
- Availability of Product – Easy availability increases positive perception, while non- availability creates dissatisfaction.
- Customer Service – Good service and proper handling of complaints improve consumer perception.
- Social and Cultural Factors – Culture, lifestyle, values, and social class influence how consumers perceive products.

CONSUMER PERCEPTION PROCESS

- Exposure

  Consumers are exposed to marketing stimuli such as advertisements, product packaging, displays, and word-of-mouth communication.
- Attention

  From the information they are exposed to, consumers pay attention only to selected stimuli that attract or interest them.
- Interpretation

  Consumers interpret the selected information based on their beliefs, past experiences, attitudes, and expectations.

- Perception Formation

  Based on interpretation, consumers form a positive or negative perception about the product or brand.

- Response

  The formed perception influences consumer buying behaviour, purchase decisions, and future actions.

CONSUMER PERCEPTION AND BUYING BEHAVIOUR

Consumer perception plays a crucial role in shaping consumer buying behaviour. It refers to how consumers understand and interpret information about a product or brand based on quality, price, brand image, advertisements, and past experiences. A positive perception creates confidence and trust in the minds of consumers, which motivates them to choose a particular product over others.

Buying behaviour is the process through which consumers decide what to buy, when to buy, and how much to buy. Consumer perception influences each stage of this process, from recognizing the need to making the final purchase decision. When consumers perceive a product as reliable, valuable, and satisfying, they are more likely to purchase it repeatedly and remain loyal to the brand.

CONCLUSION

Consumer perception plays a crucial role in shaping consumer behavior and influencing purchasing decisions. It is a complex psychological process through which individuals interpret and assign meaning to marketing stimuli based on their personal experiences, beliefs, and expectations. Since perception is subjective and varies from person to person, marketers must carefully design their strategies to create a positive and consistent image in the minds of consumers. Understanding consumer perception helps businesses in effective brand positioning, improving product quality, and developing impactful promotional activities. A favorable perception not only attracts new customers but also builds trust, satisfaction, and long-term loyalty. Therefore, organizations must continuously monitor and manage consumer perception to stay competitive in the market. By aligning marketing efforts with consumer expectations, companies can enhance customer relationships and achieve sustainable growth.

SWOT ANALYSIS

STRENGTHS

- Customers perceive KEPCO product prices as consistent and reasonable.
- Majority rate the overall quality and freshness of products as good.
- Taste of products is positively rated by most customers.
- High level of overall customer satisfaction and repeat purchase intention.
- Strong brand awareness with most customers aware for more than one year.

WEAKNESS

- Many customers are neutral or dissatisfied about waiting time at the outlet.
- Staff politeness is not strongly rated by a large portion of customers.
- Low demand for turkey and value-added products.
- Promotional activities are only slightly effective.
- Some customers feel product information can be improved.

OPPORTUNITIES

- Improve promotions to increase awareness and sales of value-added products.
- Introduce offers/combos on chicken and duck to boost regular purchases.
- Improve customer service to convert neutral customers into satisfied ones.
- Enhance product information to build stronger trust and preference.
- Use customer recommendations (word-of-mouth) to attract new buyers.

THREATS

- Changes in public market prices influence customer buying decisions.
- Competition from local poultry shops and private brands.
- Price fluctuations in the poultry market can affect customer perception.
- If waiting time is not reduced, customer satisfaction may drop.
- Inconvenient outlet location for some customers may reduce footfall

DATA ANALYSIS AND INTERPRETATION

AGE GROUP OF RESPONDENTS

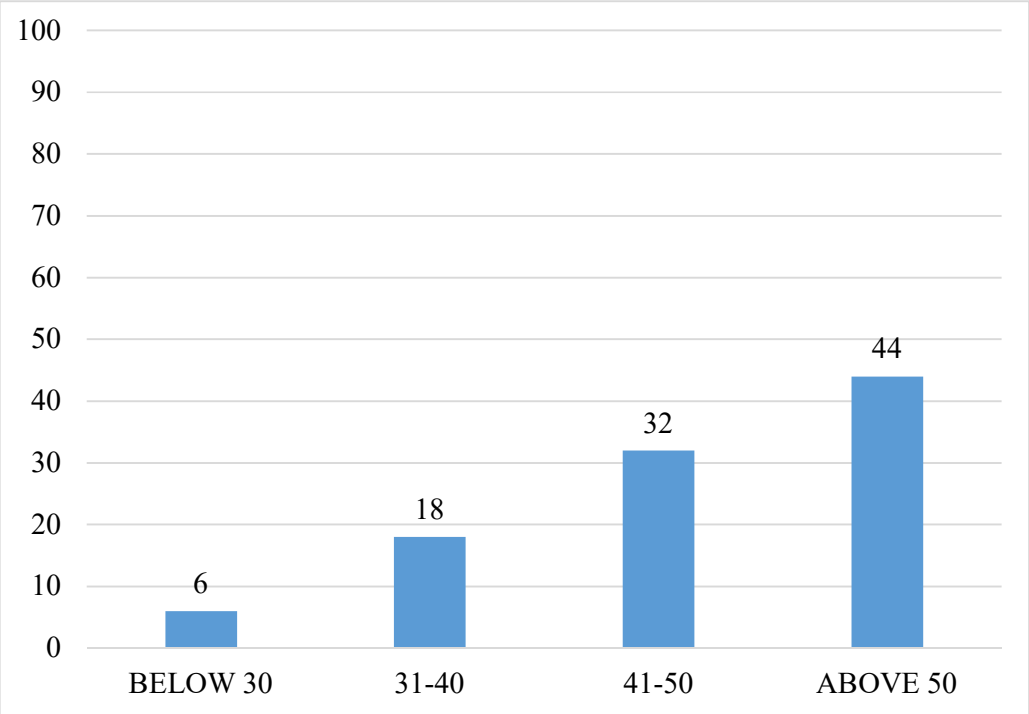

TABLE NO: 4.1DISTRIBUTION OF RESPONDENTS BASED ON AGE GROUP

AGE	NUMBER OF RESPONDENTS	PERCENTAGE
BELOW30	6	6%
31-40	18	18%
41-50	32	32%
ABOVE50	44	44%
TOTAL	100	100%

✶*Source: Primary Data*

DISTRIBUTION OF RESPONDENTS BASED ON AGE GROUP

FIGNO: 4.1

INTERPRETATION

The graph shows a clear increase in the proportion of respondents as age rises. The lowest representation is from individuals below 30 (6%), followed by a gradual rise in the 31–40 group (18%) and 41–50 group (32%). The highest share of respondents belongs to the above 50 age group (44%), indicating that older individuals form the dominant segment in the sample.

INFERENCE:

The study is largely influenced by older respondents, suggesting that their preferences and opinions may significantly shape the overall Findings.

GENDER OF THE RESPONDENTS

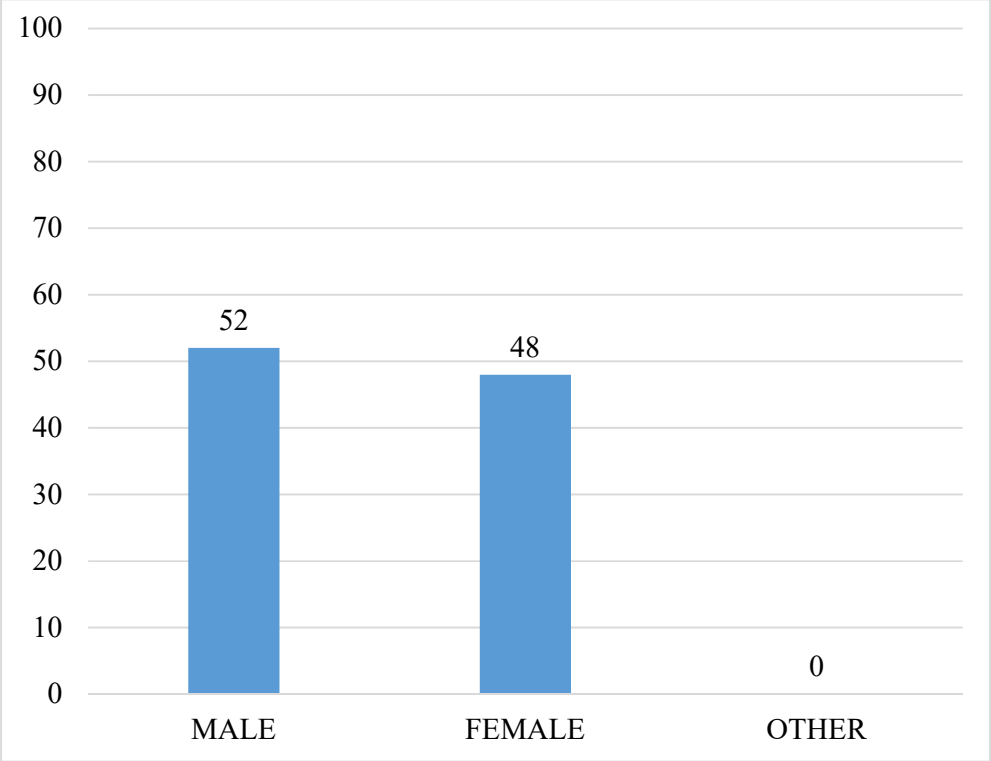

TABLE NO: 4.2 GENDER-WISE DISTRIBUTION OF RESPONDENTS

- A large portion of respondents remain neutral about staff politeness, though some find staff polite.
- Product information availability is generally considered adequate.
- The shopping environment is considered comfortable by most respondents.
- Customers are largely satisfied with the freshness of KEPCO poultry products.
- Overall customer satisfaction levels are positive, with the majority being satisfied.
- The overall quality of KEPCO poultry products is rated as good by the majority of respondents.
- The taste of KEPCO poultry products is positively rated, with most considering it good or excellent.

SUGGESTIONS

- KEPCO can introduce new product varieties and value-added products to increase demand.
- The company should encourage repeat purchases through loyalty programs or discounts.
- KEPCO should continue maintaining stable and reasonable pricing.
- More effective promotional activities should be implemented to attract customers.
- The company should improve packaging quality to enhance product perception.
- Ensure cleanliness and timely product availability at all outlets.
- Efforts should be made to reduce waiting time at the outlet.
- Staff should be trained to improve politeness and customer interaction.
- Provide better product information through displays or staff guidance.
- KEPCO should continue maintaining high product freshness and overall quality to sustain satisfaction.

CONCLUSION

The study on consumer perception towards KEPCO poultry products in Pettah, Thiruvananthapuram indicates that the brand enjoys a strong and positive image among consumers. Most respondents are well aware of KEPCO products and have been purchasing them regularly, reflecting a high level of trust and brand loyalty. Chicken is identified as the most preferred product, and customers generally perceive the pricing as reasonable and stable, reinforcing the value-for-money aspect. Key attributes such as quality, freshness, and taste are rated highly, leading to overall customer satisfaction and a strong intention among consumers to continue purchasing and recommending the products.

However, the study also highlights certain areas that require improvement, particularly in terms of waiting time, staff interaction, and promotional activities. Factors such as packaging, cleanliness, and product availability also significantly influence consumer perception and must be consistently maintained. While KEPCO has successfully established a solid market presence, focusing on service quality enhancement and more effective marketing strategies can further strengthen customer relationships, expand its customer base, and improve its competitive position in the market.
